Illustration: [cite source(s)]

Full Description: [cite source(s)]

→ (prostomium?)

Related Species: [include character differences]

shares features w/ both *P. sp. III* & *P. sp. V*. Differs in staining pattern seems to lack mid-ventral pads. mu also be similar to a *Polycirrus* sp. (2001) given to L³ earlier.

Comments:

Drawing composite from 4 spm. Have video. ask Rick
