

Crangon(group II)  
(modified from Rathbun,1904 and Schmitt, 1921)

1. Second lateral carina of the carapce armed w/ a spine.....  
..... (Meso) *C. munitella*  
Second lateral carina of the carapce not armed w/ a spine..  
.....2
2. Rostrum spiniform, sharp, projected upwards; orbital spine  
ascending, rostrum longer than carapace spine.....  
..... *C. spinirosris*  
Extremity of rostrum obtuse, not spiniform.....3
3. 1st to 4th abdominal segments smooth.....4  
1st to 4th abdominal segments carinated, at least partially  
carinate.....5
4. Anterior median spine projecting beyond the posterior portion  
of orbits..... (Meta) *C. acclivis*  
Anterior median spine not projecting beyond the poterior  
portion of the orbits..... (Meta) *C. munita*
5. 1st to 3rd abdominal segments not armed laterally.....  
..... (Meta) *C. variabilis*  
1st to 3rd abdominal segments armed w/ 2 spines.....  
..... (Meta) *C. spinosissima*  
1st to 3rd abdominal segments armed w/ 1 spine.....  
..... (Meta) *C. lomae*
