

TRITUBERCULATA

Species: SCLERONCHA SP C

Museum Number: _____

Describer: LUCAS Date: 1931 Family: PHILOMEDIIDAE

Common Name: _____

Source: _____

Synonymy: PHILOMECES TRITUBERCULATUS LUCAS 1931 Location: _____

SCLERONCHA TRITUBERCULATA POULSEN 1962

Distinguishing Characteristics:

Caudal furca 16 or 17 pairs decreasing in size from distal claw

knobbed on dorsal ridge

dorsal and ventral margins evenly arched

2.1 x 1.8

2.7 x 1.8 mm

6630

Ovigerous: J F M A M J J A S O N D

Juvenile: J F M A M J J A S O N D
