

SCAMIT CODE: LACO 32

Date Examined: July 9, 1984

Synonymy: None

Literature Cited:

Coe, 1905; Coe, 1940; Bernhardt, 1979 (unpublished); MacEwen (unpublished)

Diagnostic Characters:

Live: 10-15 cm length; 4-5 mm width. Mouth and proboscis pore separate. Body rounded in the anterior region, much flattened and with very thin margins in the intestinal region (Fig. 1). Body color greyish, pinkish, yellowish, buff, dark brown, or reddish-brown without distinctive markings. Cephalic furrows moderately long and very deep. Caudal cirrus small but conspicuous. Proboscis very long and slender. Ocelli absent. Preserved body shortens and fragments easily.
